### **Reasons For Allowance**

The following is an examiner's statement of reasons for allowance:

In view of the applicants' amendment/response filed September 9, 2005 the rejection of the claims under 35 USC 102(e) and under the judicially created doctrine of obviousness-type double patenting rejection over USP 5,587,447 because the reference does not teach *as claimed a method for producing a polyamide by a polycondensation of a dicarboxylic acid component comprising 60-95 mol% of a straight chain,  $\alpha,\omega$  aliphatic dicarboxylic acid and 5-40 mol% of an aromatic dicarboxylic acid heating to obtain a suspension of the aromatic dicarboxylic acid and adding the diamine component comprising 70 mol% of more of m-xylylenediamine to the suspension, with the reaction system being heated to allow the reaction system to change from a suspension phase into a homogenous molten phase and the diamine component being further added while maintaining the homogenous molten phase and the diamine component being further added while maintaining the homogenous molten phase, 20-60% by weight of a total amount of the diamine component being added while the reaction system is in the suspension phase before changing into the homogenous molten phase*; such is not taught by the reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
